

(SAMPLE WAIVER)

Heat-Treated Glass Waiver for Builders To All Window Suppliers

(This includes both Fully Tempered and Heat-Strengthened glass)

Due to widespread problems with poor quality Heat-Treated glass scratching during standard window cleaning procedures, Builder requires Glass/Window Supplier to provide ONLY blemish-free glass surfaces on ALL windows requiring Heat-Treated glass.

This will enable cleaning contractor to employ standard construction window cleaning tools and techniques to remove any and all construction debris from windows without scratching the glass surface. It is also accepted and understood by ALL parties that properly used razor blades and scrapers are standard tools and techniques for safely removing limited amounts of construction debris (plaster, paint, texture, tape, stickers, etc.) from quality glass, without scratching the glass surface.

Any Heat-Treated glass with a blemished surface that results in scratching during cleaning will be rejected by Builder. Such glass will be replaced at the sole cost of Glass/Window Supplier. This clause must be included in all contracts between Glass/Window Supplier and Builder. No Exceptions!

Please sign and date acceptance of this clause.
